PLEASE READ

TERMS:

Prices are F.O.B. Centerville, Utah. See "Pick Up" Discount on opposite page. All prices subject to change without notice.

DISCOUNT FOR CASH:

2% discount will be allowed for cash *in full* with order. Where credit arrangements have been approved, 2% discount will be allowed for payment before the 10th of the month following date of shipment, past due thereafter. 8% interest will be charged on past due accounts. Make remittance to Porter-Walton Co., P. O. Box 1619, Salt Lake City 10, Utah.

C.O.D. SHIPMENTS:

Orders for shipment C.O.D. must be accompanied by a remittance of one-fourth of the amount to insure acceptance.

BUNDLES OF TEN:

Bare root, shrubs and vines are ten per bundle. Please order in multiples of *ten* of each variety and/or size.

BOXING CHARGE:

Boxing and bundling for shipment will be charged at actual cost of materials used in the operation. No charge will be made for loading bulk truck lots.

WARRANTY:

The Porter-Walton Company warrants to the extent of the purchase price that nursery stock sold is true to name and as described within recognized tolerances. Seller gives no other or further warranty, express or implied and will under no circumstances be liable for more than the invoice value at the time of purchase.

CLAIMS:

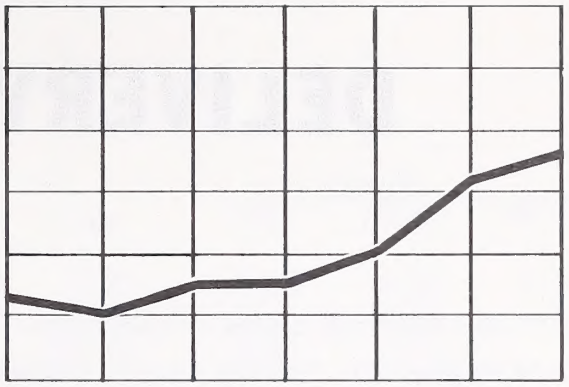
We will gladly correct any errors, but we cannot entertain any claims that are not made within 5 days after receipt of the stock. Claims should be made promptly in writing upon receipt of stock.

In case of loss due to damage or delay in transit, your claims should be made to the transportation company.

PORTER-WALTON CO.
P. O. Box 1619
Salt Lake City 10, Utah

FIGURES POINT UPWARD

You bought more MOUNTAIN GROWN trees from us last year, than in 1959. We sincerely appreciate the increased business with which you have favored us. It is especially satisfying because it indicates that your sales, too, were greater.



1955 Nursery Stock Sales 1960

NEW SERVICE LOCATION:

Nursery storage facilities are now at Centerville where the plants are grown. From this location we can assure you of fresher plants and more complete service.

SCIENTIFIC GROWING:

New scientific methods for growing container plants are being further improved to insure the consistent top quality and saleability of *Mountain Grown Plants.* The fresh clean air and water at Centerville keep plants looking bright and healthy.

SELECTION OF PLANTS:

When you come to Centerville you may select your container plants from the largest assortment of top quality evergreens, shrubs and trees in the Intermountain West. Dormant bare root stock sold in bundle lots only. We will handle packaged roses exclusively.

"PICK UP" DISCOUNTS:

Save 5% on pick-up orders. Many nurserymen and landscape contractors prefer to pick up. Handling and exposure are minimized. Distribution at your nursery or landscape job can be accomplished more efficiently.

NURSERY SUPPLIES:

All supplies listed in this catalog, other than nursery stock, will be available only at our Salt Lake City warehouse. Orders to either department will be booked and shipped independently of the other.

DELIVERY:

See Schedule on next page.

PHONE: AX 5-4782 or EM 4-6485

PORTER-WALTON NURSERY

New Improved VELVET LAWN

Gives Extra Satisfaction

1 POUND NET WT
PORTER-WALTON'S
VELVET LAWN
Contains New PARK Kentucky Blue Lawn Seed.
Makes the finest carpet for your outdoor living room!

- *Starts Quicker*
- *Roots Establish Faster*
- *Outgrows Early Weeds*

PW Seed
TREATED WITH EXCLUSIVE
TRI-KOT
(PRONOUNCED "TRY-COAT")
PROCESS
For better start and faster growth!

VELVET LAWN SEED For 1961 Contains PARK Strain Kentucky Blue Grass

This outstanding new blue grass strain developed in Minnesota is a composite cross from 15 native strains selected for their desirable characteristics. The product of this breeding program is PARK Kentucky Blue grass with seedling vigor superior to other strains. Its principal advantage is more rapid establishment. PARK's quick starting and faster early growth offer greater competition to native weeds, producing a smooth, clean looking lawn sooner than other grasses.

New VELVET LAWN contains PARK Kentucky Blue, regular Kentucky Blue Grass, Creeping Red Fescue and White Dutch Clover.

MAGIC CARPET LAWN

Registered Trade Mark

Pure TRI-KOT Treated

MERION KENTUCKY BLUE GRASS

Pure Merion Blue Grass lawns have won the admiration of proud homeowners and neighbors everywhere. Each year since its introduction, the demand for MAGIC CARPET LAWN grass has increased. Rich, deeper green color and finer texture set this new variety apart as a superior grass for home lawns. A neat carpet-like apperance is more easily achieved with Merion because it thrives under mowing as close as ½ to ¾ of an inch high.

Somewhat slower growth and lower water requirement make MAGIC CARPET LAWN easy to care for — less mowing — less watering. It must, however, be fertilized frequently during the early development period (2 to 2½ pounds of Ammonium Sulphate per 1000 square feet each month for the first year). Usually two or more feedings each subsequent year will keep it in top condition. Weeds cannot compete with a well cared for MAGIC CARPET LAWN. Only **Pure** Merion Kentucky Blue Grass gives the planter all the advantages of slow growth, close, neat trimming and uniform deep green color.

Exclusive TRI-KOT seed treatment protects seeds from insect and fungus damage. Stimulates quicker germination and faster early growth.

PARK KENTUCKY BLUE GRASS

PARK Kentucky Blue Grass was developed at Minnesota State College. It is a composite cross of 15 selected strains of Blue Grass which exhibited desirable characteristics. Outstanding seedling vigor which gives more rapid establishment of the turf, is its principle advantage. It germinates more quickly and grows faster in the seedling stage to give greater competition to native weeds. It develops a fine textured smooth turf.

1-lb. carton ..... $1.35 Case 12 $10.20

NEWPORT KENTUCKY BLUE GRASS

This outstanding new strain of Kentucky Blue Grass is in some respects superior to Merion Blue. It germinates more quickly and has much greater seedling vigor ,which gives it the advantage of producing a thick turf in less time than Merion. It is also less susceptible to rust.

ATHLETIC FIELD MIXTURE

Many Intermounatin playing fields demonstrate the durability and quick recovery qualities of PORTER-WALTON'S Athletic Field Mixture. This is a balanced blend of Perennial Rye, Meadow Fescue, Kentucky Blue Grass and Creeping Red Fescue. See bulk price list at right.

WHITE DUTCH CLOVER

The best Clover to include in lawn mixtures. Its advantages are that it grows quickly, remains green all season, and is helpful to grasses growing with it.

Cyclone Broadcaster

Most Efficient Spreader for Modern Pelletized Fertilizer

This improved model has control knob at top of handle, larger wheels, 16" wheel base and realigned handle for greater efficiency and durability.

With each trip across the lawn, Cyclone covers a strip from 5 to 10 feet wide; 5 feet with blue grass seed; 10 feet with modern pelletized fertilizer. The lawn can be fertilized in less than half the usual time, and with more uniform coverage. Feathered edge distribution eliminates missed spots and double coverage.

Hopper capacity 2/3 cu. ft. (5 gal.) Baked enamel finish.
8-inch wheels — 1½" tread — nylon bearings.
Shipping weight 17 lbs..... List Each $26.00 Dealer $17.50

FERTILIZER MEASURING DISPENSER

Accurate – Safe – Speedy

Promote uniform healthy growth of annual seedlings or container plantings without danger of overfeeding and consequential burning of part of the crop. The lightweight plastic hopper holds up to 20 pounds of dry fertilizer, the cavity in the measuring drum is adjustable from ½ teaspoon to 3 teaspoonfuls. Easily operated by moving the handle down to drop the fertilizer charge and up to reload. The fertilizer is delivered to individual cans through a long aluminum tube. Operator, in normal walking position, can move quickly down the rows.

Each $39.50

TREE WRAP

Properly used, spiral Tree Wrap saves many new trees. It is especially useful in plantings along highways, south sides of buildings, or other situations where new trees are exposed to heat reflection or wind. Smooth-bark trees such as Maple, Willow and Cut Leaf Weeping Birch, are especially susceptible to burning and benefit most from the application of Tree Wrap at planting time. When used with Tree Heal to repair damaged bark or breaks, Tree Wrap hastens clean healthy healing. It is made of krinklecraft laminated asphalt paper in 4″ strips, rolled for easy handling, 2½ pounds per roll — 75c.

WILT-PRUF

Wilt-Pruf is a versatile plant protector in a liquid plastic spray form. When transpalnting evergreens or deciduous plants late in the season, Wilt-Pruf sprayed on the foliage before digging protects the plant from excessive transpiration, makes transplanting safer. Spray Wilt-Pruf on container grown or field grown plants in November or early December to portect them from Winter damage. Wilt-Pruf winter protection maintains plants in saleable conditon and cuts profit losses.

Well Fed Plants Sell Themselves --- Help Boost Volume and Profits

Feed as you water and save labor costs — you can produce vigorous well-developed plants more quickly or maintain container plants in the sales yard in fresh sparkling green condition with a **MEASUREMIX** liquid fertilizer dispenser.

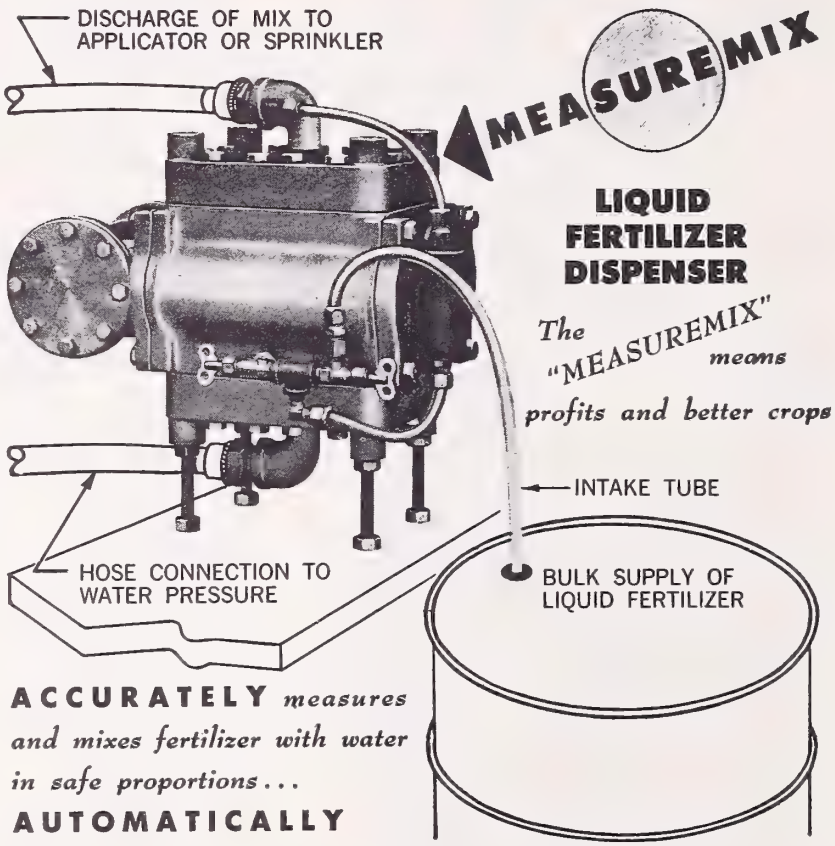
General Feeding Recommendations

Maximum quality and efficiency can be obtained only when the feeding formula is scientifically in balance with the growing medium. Dependable analysis of your soil mixture, together with balanced feeding recommendations, can be obtained from Soil & Plant Laboratory, Inc., 2301 West Chapman Ave., P.O. Box 689, Orange ,California.

The following suggestion may be suitable for general feeding:

3 lbs. AMMONIUM NITRATE
1½ lbs. MURIATE OF POTASH

Dissolve in:
10 gallons of water in a Concentrate tank.
This concentrate, injected into the watering system at 1 to 100 ratio, makes 1000 gallons of mild plant food solution. Apply at each irrigation.



DISCHARGE OF MIX TO APPLICATOR OR SPRINKLER

ORTHO
Lawn and Garden Food 16-16-8 Pelleted

Easier to Spread . . . Safer to Use

Ortho high analysis plant food gives you a 35% higher nitrogen ratio plus 9 essential trace elements — provides an improved feeding formulae for lawn, shrubs, trees and roses. Each pound goes twice as far. Apply ten pounds per 1,000 sq. ft. per feeding.
Chemically blended for absolute uniformity and pelletized for easier, safer application. Dust-free pellets cannot burn foliage.
Ortho's new Nitric Phosphates resist fixation in the soil — give you more useable Phosphoric Acid. Two forms of both Nitrogen and Phosphorus give immediate and continued availability.

SOLUBLE FERTILIZERS

When only half case lots are ordered, the price is one half of the case price plus 20c to partially cover costs of repacking.

FOLIAGE FEEDING

Plant foods sprayed in solution onto the leaves of plants are 75 to 85% absorbed into the leaves within the first hour. From tests which established this fact, it has been determined that foliage feeding is 16 times more effcient than soil applications.

The ease and speed of sprayer applications make frequent feedings entirely practical. Soluble plant foods can be incorporated with insecticides to make a two purpose spray. A series of moderate feedings will produce more consistent plant health with corresponding increases in growth and beauty.

RA-PID-GRO

RA-PID-GRO contains 11 vital plant food elements plus vitamins in a concentrated (23-21-17) soluble fertilizer for liquid feeding either in the soil or as a foliage spray. Roses, flower plants, shade trees, fruit trees and most other plants produce amazingly more and better fruits or flowers when regularly fed with RA-PID-GRO.

LAWN GREEN

New lawn reviving, soil conditioning liquid fertilizer contains 17% nitrogen in two forms. (Nitrate, immediately available and Ammonic, long lasting).

By correcting the Sodium-Calcium ratio in the soil, Lawn Green makes soil more friable, enabling water and plant food to more easily penetrate the root zone.

Nitrogen is the most important plant food element for grass. Lawn Green makes grass grow thicker, deeper green — much more beautiful.

One gallon plastic cubitainer in protective carton—

Treats 2,000 Sq. Ft.

$2.95 Case 4 55 lbs. Dealer $7.48

Easily applied with the Ortho Lawn Sprayer. Pour the recommended amount of Lawn Green undiluted into the Lawn Sprayer jar. Attach to the hose and let water pressure do the work.

Here is Better Health for Plants of Garden and Agriculture

Yellowing foliage is the primary symptom of iron deficiency or chlorosis. Affected plants produce inferior crops or weak stemmed, anemic-looking flowers. Modern soil chemistry has developed the cure, restoring beauty to gardens and productivity to farms. Where alkaline soil adds to the problem, soil sulphur or liquid Ortho-Rix increases effectiveness of the iron chemicals.

IRON is essential to plant nutrition and health.

SEQUESTRENE 330 Fe

IRON CHELATE ESPECIALLY FOR ALKALINE SOILS

- **Creates new dark green growth.**
- **Restores plants to full vigor.**
- **Produces more blossoms.**

Sequestrene 330 Fe Chelated Iron remains in soluble form and always available to plants. It overcomes iron starvation which destroys beauty and productivity. This form of iron chelate has been proven to be most effective for plants growing in Western alkali soils. It can be used in the soil or as a spray on the foliage.

	List			Dealer
1-lb. can	$3.19	cs. 6	14 lbs.	$11.52
5-lb. bag	9.00	Each	lbs.	$6.25

IRON SULPHATE

IRON SULPHATE is a highly effective treatment for chlorosis of trees, shrubs, etc. For lawns, apply at the rate of 2 pounds per 100 square feet. Large trees require 2 ounces per square foot of the area where roots are present. As a spray, mix ½ lb. of Iron Sulphate in 10 gallons of water.

25-lb. bag	$2.75	Each	$1.66
100-lb. bag	8.00	Each	5.50

SOIL SULPHUR

High grade sulphur is one of the best soil conditioners available for clay and alkaline soils. Apply in fall or spring at the rate of 5 to 10 pounds per 1000 square feet. Sulphur improves fertility, loosens soil and improves water penetration. As it changes to sulphuric acid it frees the formerly unavailable plant foods in the soil such as potassium, phosphorus, calcium, magnesium and iron.

SUNSHINE
PEAT MOSS

Because Sunshine Peat Moss is the most efficient organic soil rebuilding product, it has gained significantly each year in volume of sales. Sunshine brand is 98 to 99% organic matter the cleanest, purest peat moss you can buy. Water retention ratings, too, are 50% to 500% higher than those of competitive products. Having a PH of 3.2 to 4.0 (acid reaction) it is an ideal additive for our alkaline soils. In clay soils, Sunshine peat moss improves aeration, increases water penetration, prevents baking and encourages root growth. In sandy soils, it retains moisture and prevents leaching out of plant foods.

Cascade SOIL-AID

AIDS PLANT GROWTH — GIVES A RICH APPEARANCE TO GARDEN BEDS

100% BARK CHEMICALLY TREATED, BACTERIA ACTIVATED, COMPOSTED

NO WOOD — NO SAWDUST — NO SHAVINGS

Cascade SOIL-AID is a proven product well accepted by the home gardener, commercial grower, nurseryman and landscaper. It makes an ideal mulch around seedling plants, shrubbery, evergreens and vegetable gardens. As a mulch SOIL-AID keeps the soil and plant roots cool, helps retain moisture. When applied two or three inches deep, it discourages weed growth. Composted SOIL-AID can be safely mixed with the soil before planting. It helps admit air and water, encourages root growth and forms valuable humus in the soil.

Soil Saver, applied to a 3 to 1 slope before planting lawn seed in the Fall.

May 1st. Grass has grown through the Soil Saver and concealed it. Slope has developed without damage from Fall or Spring storms.

SOIL SAVER PREVENTS LOSS

Protect your new lawn plantings from erosion by sudden storms or overwatering. When sprinklers near the bottom of slopes drain out they frequently wash away the soil leaving unsightly holes. Soil Saver Erosion Netting applied in areas of likely damage can protect you from loss and insure customer satisfaction. Soil Saver Erosion Netting is used effectively on steep banks of fills in Highway building projects as well as on industrial and home lawn seeding jobs.

Rain Bird Sprinklers

RAIN BIRD Sprinklers make the ideal permanent sprinkling system for large lawns. Rain-like spray, slowly and evenly distributed is most efficient on heavy clay soil. RAIN BIRDS give dependable performance — have long service life.

Rain Bird Sprinklers Model No.	Coverage Diameter	Sprinkler Thread Size	Weight Each	List Each	Dealer
No. 25—Part Circle.....	80 ft.	½"	¾ lb.	$5.00	$3.35

No. 25 DO-ALL — Most popular RAIN BIRD because it is tailor-made for any home watering requirement. Simple trip lever can be set for full circle or any part of a circle. With the touch of a finger the baffle adjusts height and distance of throw from 10 to 40 feet radius. Quality construction throughout gives years of uniform, rain-like watering.

	20 to 80 ft.	½"	¾ lb.	$5.75	$3.75
No. 35—Full or Part Circle.....	95 ft.	¾"	1½ lbs.	$9.45	$6.15

No. 35B-DA DO-ALL — The No. 35 Du-All offers all the advantages of the original Rain Bird Du-All, but in a larger capacity sprinkler. This new heavy duty Rainbird covers part or full circle areas of 10 to 47 feet radius. Its 3/16 inch jet delivers water in greater volume.

	20 to 95 ft.	¾"	1½ lbs.	$11.95	$7.75
No. 148 8" SLED BASE.....		½"	1¼ lbs.	$ 2.35	$1.50
No. 151 RING BASE.....		¾"	2 lbs.	$ 2.50	$1.60
No. 150 RING BASE.....		½"	2 lbs.	$ 2.25	$1.45

DEFLECTOR SHIELD — Protects buildings or walks from back spray. Specify size of pipe to be fitted. (½" or ¾") For ring base use ¾" size.

Each $2.25 Dealer $1.50

RAIN JET Sprinklers

The greater coverage of Rain Jet Sprinklers allows more efficient, more economical sprinkler system installations. Remarkable uniformity of distribution is achieved by Rain Jet sprinkler heads through their patented rotary-pop-up-pendulum action. Water is discharged at a low constantly changing angle of throw — drops like gentle rain over the entire area.

Rain Jets can be mounted on Rain Bird sprinkler bases or on permanent pipe standards.

Soilaire

SOILAIRE

For Healthy Lawns

Soil aeration is now considered an essential and most beneficial lawn care practice. Soilaire (the mechanical earthworm) removes small plugs of sod leaving holes that allow water, air and fertilizer to penetrate down to the roots.

Soil aeration increases value of fertilizer, conserves moisture, and helps grass and trees grow better by encouraging more vigorous root development.

Soilaire is sturdily made of plated tubular steel for years of service.

Weighs only 3¾ lbs.....List $6.95

WEEDAZOL

WEEDAZOL is the ACP trademark for a 50% 3-amino-1,2,4-triazole (Amizol) formulation which has been thoroughly tested and found particularly useful in controlling broadleaf perennials such as Canada thistle, Russian knapweed, leafy spurge, and perennial grasses such as quack and Bermuda grass. WEEDAZOL also kills cattails, tules and horsetail rush as well as certain woody plants including poison ivy, buckbrush, some ashes and scrub oak. WEEDAZOL is a systemic herbicide that affects the production of cholorophyll (the green coloring matter in leaves) of treated plants. Treated plants usually turn white and die slowly.

WEEDAZOL has several chemical advantages. It does not volatilize to form harmful vapors which might damage nearby sensitive crops. It dissolves in water so no special spray equipment is needed; there is no problem of nozzle clogging; and the solution can be rinsed easily by flushing the entire spray system with clear water. WEEDAZOL is not toxic to humans, animals or fish at the concentrations needed to control weeds and is not a fire hazard. WEEDAZOL is readily inactivated in heavy soils and does not build up a toxic residue at rates needed to kill perennial weeds.

NEW from ORTHO

KLEENUP Crab Grass & Insect Killer

Ortho brings you new convenience — easier application — greater accuracy of coverage — in this new granule form Crab Grass Killer.

KLEENUP kills crab grass seeds before they sprout — kills lawn insects — and feeds the lawn. Arsenical impregnated granules do not stick to the grass foliage but fall to the soil surface where crab grass seeds are located. Organic urea provides nitrogen plant food, releasing nourishment gradually. The 40-pound bag covers 2000 square feet.

In research plots throughout the country, including Intermountain States, KLEENUP has demonstrated superior killing power — up to 98% control.

ORTHO LIQUID CRAB GRASS KILLER

Most Economical

A specially formulated liquid crab grass killer containing the new more effective **AMINE METHYL ARSONATE.** This chemical, when applied as directed, gives greater control of crab grass but does not harm desirable grasses including Bent, Merion Blue, Kentucky Blue and Red Fescue.

AMA is safe to use throughout the crab grass season but is most highly effective in late May, June and July when young crab grass is starting. Extremely economical control with AMA costs only one-fifth as much as with dry lead arsenate type treatments.

CRAG HERBICIDE 1

Crag Herbicide-1 has been proven through years of use in Agricultural experiment stations, commercial farms and in thousands of home gardens. It is one of the safest and easiest to use weed controls available. Crag Herbicide-1 is harmless to plant foliage but after contact with moist soil, it changes to a powerful weed preventer. It kills all germinating weed seeds.

CRAB GRASS SEEDS in lawns can be most effectively and economically killed with spring sprayings of Crag Herbicide-1. **ONE SPRAYING PREVENTS WEEDS FOR UP TO SIX WEEKS.**

Prevent Weeds Safely — Economically With Geigy Herbicides

SIMAZINE 80-W

Simazine is a pre-emergent herbicide for control of both grass and broadleaf weeds. It is highly effective, safe, and economical to use around the nursery or in landscape areas where no plant growth is wanted. A single pre-emergence application at the rate of 12½ pounds per acre in 25 to 100 gallons of water, applied from Fall to early Spring, will prevent growth for an entire season, of such grasses and broadleafed weeds as barnyard grass, witchgrass, yellow foxtail, wild oats, crabgrass, plantain, pig weed, rag weed, night shade, perslaine and mustard. Simazine 80-W has very low toxicity to human and domestic animals and can be used around buildings, walks, driveways, and other areas. The low solubility of Simazine allows it to remain in the upper soil layers with practically no lateral leaching and a minimum of leaching downward. There is no danger of injury to nearby crops, ornamentals or shade trees from drift of the chemical spray because it does little or no damage to foliage.

Application rate per 1,000 sq. ft. — 5 to 8 oz.

5 lb. bag	List $ 17.50	Dealer $ 14.00
50 lb. carton	List $159.50	Dealer $137.50

ATRAZINE 80-W

Atrazine 80-W Herbicide, being much more soluble than Simazine, is effective as either a pre-emergence or post-emergence herbicide for the control of both grass and broad-leafed weeds. Because of its high solubility,, Atrazine is especially recommended in areas of very low precipitation. The low toxicity of Atrazine 80-W to humans and animals makes application possible around building, walks, driveways, parking lots and other areas where the use of toxic herbicides would be hazardous. A single application at 12½ pounds per acre in 25 to 100 gallons of water will control both broad-leaf and grassy weeds for an entire season. For longer residual control or on heavy mineral or organic soils or for control of more resistant perennial weeds, rates up to 20 pounds per acre should be used. Applications can be made at any time from Fall or very early Spring until the weeds are 6″ tall.

5 lb. bag	List $ 17.50	Dealer $ 14.00
50 lb. carton	List $159.50	Dealer $137.50

ATRAZINE 8G GRANULAR FORM requires 187½ pounds per acre.

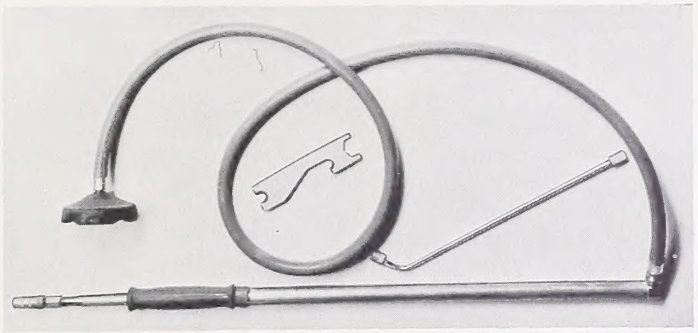
Suburban Power Sprayer

The new 10-gallon Hudson Suburban power sprayer meets the needs of every homeowner who has shade or fruit trees and tall shrubs. Designed especially for the home garden, the Suburban is only 21″ wide, can be pulled along garden paths to take the sprayer and solution where spraying is needed. One h.p., 4-cycle, air-cooled gasoline engine drives the piston-type pump and dasher agitator. Will handle any sprayable solution. Equipped with 10 feet of high pressure spray hose, shut-off valve, 24-inch extension and the famous adjustable 5-spray nozzle.

SUBURBAN No. 1012 List $149.60 Wt. 101 lbs. Dealer $112.18



PAMPCO SPRAYER
Sprays trees up to 40 feet high

The superiority of the PAMCO sprayers is based on their simple design, precision engineering and sturdy construction. The Pamco adjustable nozzle is famous for easy accurate adjustment from a fine mist to a 40-foot stream. The pump of machine turned brass generates up to 200 pounds pressure, sprays on both forward and back strokes. Easy action.

Sprays any liquid or powders in solution.

Pampco is the ideal sprayer for home garden and orchard, poultry and dairy farms. Draws spray solutions from a small pail or 55-gallon drum.

GARDEN DUSTERS

The **ADMIRAL** is the most versatile — most efficient dust applicator for the home garden. With the 21-inch extension and swivel nozzle, dust can be directed to the base of plants and underside of leaves without stooping. The reservoir holds nearly a pound of dust. Extra large pump plunger produces ample air pressure for fast application of dust in a uniform cloud.

The **CADET** holds ¼ pound of dust. It is designed for small garden and household use to control ants, roaches and other pests.
